## PROFILE

Senior Front-End Developer with a passion for continuous learning and self-teaching. Currently working in the field, I specialize in developing web applications using technologies such as Vue.js, PWA, and Capacitor. I began my career as a freelancer, where I gained knowledge in React Native and TypeScript, which I now apply in my current work. Although I am still pursuing higher education, I strive to stay updated on industry trends, constantly improving my skills to deliver high-quality solutions. I am dedicated, passionate about technology, and committed to the success of the projects I work on.

## EMPLOYMENT HISTORY

❖ **Supervisor de TI, Qualicorp - remote.....** Jul 2025 — Present  
*Campo Formoso*

Qualicorp selected top-performing third-party collaborators for internal integration, and I was selected to join the internal team. In my first two months, I designed and implemented a full push notification API to deliver and monitor critical notifications in the Qualicorp app.

Firebase / MongoDB / Node/Express / Nuxt / RabbitMQ / Vue.js / Vuetify

❖ **Software Developer Senior, Talent Group - remote.....** Nov 2023 — Jul 2025  
*Campo Formoso*

After leaving Mirante Tecnologie, our clients at Qualicorp appreciated my work so much that they recommended me to be hired by Talend Group, so I could continue working with them. I developed two Capacitor plugins. The first one implements internal SSL Pinning (HTTP Public Key Pinning), integrated through Azure DevOps with user-based key management. The second plugin is a security bundle featuring jailbreak detection, emulator detection and root detection

Software Developer / Vue / PWA / Javascript / React Native / Git / Android / IOS / Web / TypeScript/ Tailwind CSS

❖ **Software Developer | Mobile, Mirante Tecnologie - remote.....** Dec 2020 — Sep 2022  
*Bertioga*

This was my first full-time job as a developer at a Qualicorp client. When I started, I had no prior experience with Vue.js 2, Capacitor, Firebase, App Store and Google Play submission, yet I was responsible for developing a complete WebApp project using these technologies. The application was white-label solution used by more than 4 million clients across Brazil. I independently implemented the mobile front-end for Qualicorp, Clube de Saúde, Uniconsult, and Aliança, without UX design support.

Software Developer / Vue / PWA / Javascript / React Native / Git / Android / IOS / Web / TypeScript/ Tailwind CSS, Vuex

❖ **Mobile Developer, Megarepasso - remote.....** Jan 2019 — Jan 2020  
*São Paulo*

This was my first React Native project. I worked closely with another Senior Developer and I was able to help him build the app from scratch. The app is an auction app for purchasing used cars, and at the time it was delivered, each announced car was purchased in less than 5 minutes after being announced in the app.
